BARRIER KERB & CHANNEL – BREAKOUT

LAYBACK KERB & CHANNEL – CONNECTION

SLAB ABUTTING BARRIER KERB AND CHANNEL

Saw cut existing kerb & channel on both sides of driveway.
 Provide 3N12 dowels x 300 long on each side of driveway (100 embedded into existing kerb & channel) to tie in new construction.

- NOTES:**
1. Access driveways with grades greater than 10% (10:1) within property boundaries shall be constructed with non erodible material (ie Bitumen, Asphalt, Concrete, Pavers)
 2. Side drains shall be lined and batter slopes protected to prevent erosion. All drainage from within the property and on the driveway surface shall be collected at or inside the property boundary and discharged by way of a sealed pipe or other approved means to Council's drainage system.
 3. Crossings are not designed for commercial vehicles.
 4. Footpath sections to vary where necessary for commercial vehicles.
 5. Footpath earthworks adjoining concrete must be well compacted.
 6. Concrete surface tolerance to be $\pm 10\text{mm}$ over 3 metre sections
 7. Concrete N25 in accordance with AS 379:2007 and AS 3600:2009.
 8. Reinforcement fabric to AS/NZS 4671:2001, 50 top and edge cover, lap fabric 250.
 9. Approved materials for construction :- Concrete, Paving blocks or Asphalt, refer to project drawings.
 10. Expansion joints to be 10 thick, full depth closed cell cross linked polyethylene foam (85 – 150 kg/m³).
 11. A Road Works permit must be obtained from council. Seek approval of location and levels prior to excavation.
 12. Kerb openings & driveway construction shall be carried out in the section of road reserve contained within the extended property boundary lines.
 13. All dimensions in millimetres.
